DETAILED ACTION

1. Applicant's election with traversal of Group III, claims 9-15, specie insulin-like growth factor 1, filed October 27, 2003, is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. The requirement is still deemed proper and is therefore made FINAL.
3. The cancellation of claims 1-8 and 16-28 has been acknowledged.
4. Claims 9-15, insulin-like growth factor 1, are examined on the merits.

SPECIFICATION

5. The title of the invention is not descriptive due to the instant title being directed to a method of optimizing hormone replacement while the instant claimed subject matter is directed a system and method for monitoring patient receiving human growth hormone. A new title is required that is clearly indicative of the invention to which the claims are directed.

INFORMATION DISCLOSURE STATEMENT

6. Documents A.R to L.S have not been considered due to said documents listed on the FORM PTO-1449 not being in the instant application. The FORM PTO-1449 has been placed in the application file, but the information referred to therein has not been considered.

CLAIM REJECTIONS - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Burns et al. (US 5,284,133 A).
3. Burns et al. discloses a method and system for monitoring the administered dosage of human growth hormone and insulin-like growth factor in a treatment regiment directed to a patient (Abstract etc. and column 6, lines 9 and 24) as in instant claim 14.
4. A physician, pharmacist, or other authorized health care professional at an off-site location analyzes the treatment regiment history (Abstract etc.). During the patient's check-up with the physician (on-site), said physician can analyze the patient's treatment history and counsel said patient or adjusting the treatment regiment accordingly (column 11, line 65 to column 12, line 2). Patient returns to the hospital or physician's office to receive the medication (column 1, lines 34-40), as in instant claims 10-12.
5. Further, Burns et al. discloses that drug side effects (patient responsiveness to administered drug) can be mitigated by properly controlling said dosage (column 1, line 66 to column 2, line 1), as in instant claim 9.
6. The system of Burns et al. comprises a controller which communicates with a recording device and a signal device for alerting patients (Figure 2 and column 10, lines 20-32). A physician could program a computer chip with data directed to dosage and schedule (column 4, lines 51-60), as in instant claims 13 and 15.
